

RETOOLING PRACTICALITY

WHAT TEACHERS HAVE TO SAY

ELICIT

"Used it as a ticket to get their unit review for our summative tomorrow, and was surprised by the honesty on the two follow up questions. It allowed me to pull a couple kids aside to discuss their answers. The conversations I had were much more reflective from the students' standpoint of their learning, and I left those conversations confident that they were in a better place. I'm definitely going to be using this throughout the year!"

"You can teach an old dog new tricks..."

ENGAGE

EXPLORE

"The assignment was very relatable to students providing meaning to their research. Their classmates were able to connect with the information on a familiar level as well. Overall, it was a great way to drive student engagement."

"The students were excited to try something new, experience research more authentically, and make sense of their research using a format that they were familiar with and used often."

ELABORATE

EVALUATE

"The Amazon review feedback form encouraged students to give much deeper and more meaningful feedback to their peers. The RISE portion in particular focuses on affirmations and constructive inquiries to help the final product be even better. Students felt like their peers were partnering with them to improve their products."
