

Designing a Plan for Effective Monitoring

Current State

*What system elements are currently in place? To what degree? Cite evidence.
Where do disparities in success occur for all groups?*

Future State

What is your goal? Timeline? (X to Y by when)

Success Criteria: When systems for daily monitoring and analysis of real-time data are in place the experience for

– *Students will be...*

– *Teachers will be...*

– *Leaders will be...*

Monitoring

*In addition to our success criteria, what other measures would point to meeting our goal/ideal state?
If we reach ideal state, how will we know? What will be our evidence?*

Lead Measures

What are the daily/weekly adult actions that influence the lag measures? How will teams own that work? How will the function of monitoring & PLCs change?
