

SREB Continuous Improvement PDSA template Topic:
(Problem of Practice)

Step	
1. PLAN (Approach/Root Cause)	Validate the need for improvement (How are we doing? How do we know? What documents do you have? What does research say?)
2. PLAN (Establish Goals, Action Steps and Measures)	Clarify purpose, goals, and measures. (Why are we here? What do we need to do well together? If/then...If we do this, then we will see this. How will we measure success?)
3. PLAN (Develop Action Plan)	How will we achieve outcomes and how will we know? Identify action steps, person responsible, measurement, and date of completion. (Action steps, person responsible, measurement, results, completion date? DETAILS)
4. DO (Deployment)	GO and TEST your change ideas. (How will we work together to improve? How long will we try our change idea? What will we do differently?)
5. Study (Learning)	Analyze the results. Adopt Broadly, Adapt and Retest, Abandon (What happened during the deployment phase? What were the outcome results? What was the impact of the improvement on student achievement?)
6. Act (Integration)	Make Improvements. Implement and monitor progress, adapt as needed. (What did we learn and what do we do next to improve? How can this be refined or improved? How do we share process with others?)

What is your WHY?

Whirlwind
